Introduction	I'm a web developer with moderate experience on front end and back end, now in a fever of learning everything in this area.
Education	<p>UCLA 2014-present</p> <ul style="list-style-type: none"><li>-Major: Mathematics in Computation</li><li>-Expect to graduate in Spring 2018</li><li>-GPA: 3.2</li></ul> <p>The Hill School 2011-2014</p>
Skills	<p>HTML5/CSS/Javascript</p> <p>PHP</p> <p>Python</p> <p>C++</p> <p>Ajax(entry-level)</p>
Research	<p>I worked at Dr. Ascenzi's lab to write and debug Python files to assist with the preparation of mathematical-engineering models of bone microstructure to further the understanding of the scenario of fragility fractures. My work was to write Python files to do interpolation on cubes of bone tissues, and then use Abaqus to validate the results. ***Due to Univeristy policy, all files are confidential, therefore cannot be presented on my personal webpage.***</p> <p>Director: Maria-Grazia Ascenzi, PhD</p> <p>Adjunct Professor and Researcher</p> <p>Department of Orthopaedic Surgery</p> <p>UCLA</p>
